

# 'Train-The-Trainer' (T3) FADU Orientation and Training Tips

*The Premier Global Provider of Industrial Fluid Sealing Consulting and Training Products & Services*

**OBJECTIVE:** To familiarize technical training instructors with the operation and maintenance of the JJENCO Flange Assembly Demonstration Unit (FADU) mechanical maintenance training platform and equip them to use the FADU most effectively in a classroom training environment.

**DESCRIPTION:** The course fully familiarizes plant Training personnel with the use of the FADU as a training platform to support their existing bolted joint training curriculum.

The course consists of a one-half day instructor-led orientation to the FADU, covering all aspects of its use, including unpacking, software installation, FADU setup, GCM and TPM use, suggested demonstrations, training tips, equipment takedown, maintenance recommendations, and storage/transport recommendations.

The second half of the day is devoted to instructor-supervised role play where the plant Training personnel take turns using the FADU to teach various segments to the 'class' of instructors, who in turn subsequently critique the teaching instructor's use of the equipment.

**DURATION:** 8 Hours

**COST:** USD \$2000, \$100/hr travel time NTE 12-hours per day, plus business class expenses. Client to furnish FADU, hand tools, and consumable items.

**PREREQUISITES:** None

**AWARD:** Certificate of Completion

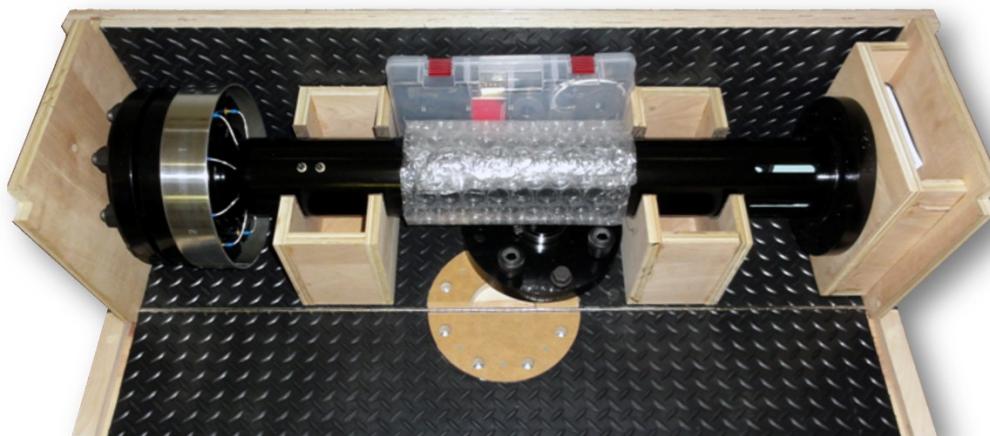

**RESTRICTIONS:** Training Department must own a JJENCO FADU.
